WILLIAM A. KOSKI, P E

Project Manager
CDM Federal Programs Corporation

QUALIFICATIONS SUMMARY

As a project manager, Mr. Koski has 21 years of experience, with ten in the hazardous waste field. He has extensive experience in managing complex programs, projects, and large organizations; served as a senior manager for a \$100 million/year engineering services, utilities and public works business including a complete environmental program and associated services; worked at the EPA coordinating federal agency compliance for the development of the RCRA and CERCLA programs. He currently manages projects in support of EPA's RCRA Implementation Program and the Air Force Installation Restoration Program.

EXPERIENCE

As a manager of RCRA implementation support contracts, Mr. Koski managed 39 work assignments including 19 RCRA facility assessments, RCRA inspections, RCRA corrective action support assignments, comprehensive monitoring evaluations, closure plan reviews, Part B reviews, and mining waste and cross media regulatory support

He has managed a work assignment to develop a treatability study clearing-house for the EPA's Superfund program and authored an EPA technical document as a part of this assignment. The initial technologies included were those supporting Best Demonstrated Available Technology and Land Disposal Restrictions regulatory development

Mr. Koski, as manager of an Air Force Installation Restoration Management (AFIRM) Committee support contract, completed a focused feasibility study at an NPL site obtaining a Record of Decision, reviewed remedial action plans, drafted RI/FS guidance, and drafted interagency agreements.

Mr. Koski's responsibilities as a facility manager included the management of the hazardous and toxic waste program with EPA certified lab capability. Identified waste and developed most economic disposition. Managed hazardous waste storage closure, Part B permitting, asbestos removal, landfilling operations, PCB program, and cleanup of hazardous waste spill sites.

EDUCATION

- M.S. A. - Industrial Management, George Washington University, 1981
- M.S. E - Sanitary Engineering, University of Michigan, 1971
- B.S.E. - Civil Engineering, University of Michigan, 1970
- B.S. - Chemical Engineering, University of Wisconsin, 1965

REGISTRATION

Professional Engineer, Virginia

HONORS

Chi Epsilon, Defense Meritorious Service Award

PROFESSIONAL
SOCIETIES

Project Management Institute
Water Pollution Control Federation/Federal Water Quality
Association
Society of American Military Engineers
Conference of Federal Environmental Engineers
American Public Works Association

PROFESSIONAL
HISTORY

1986 to date Project Manager - CDM Federal Programs Corporation

Manage RCRA Implementation Support contracts, Air Force
Installation Restoration Management support contract,
and airborne hazardous substances contract.

1983 - 1986 Executive Officer - Navy Public Works Center, Guam

Managed \$100 million per year engineering services,
utilities and public works business including a complete
environmental program and associated services.

1981 - 1983 Division Director - Naval Facilities Engineering Command
Headquarters

Directed systems analysis and planning staff for
analysis of major construction projects and facilities
support of all Navy activities.

1978 - 1981 Federal Facilities Compliance Coordinator -
Environmental Protection Agency Headquarters

He formulated the strategy, policy and procedures for
federal facilities compliance. He resolved compliance
issues concerning RCRA, CERCLA, air, water, drinking
water, solid wastes, and toxic wastes. He annually
